Top 5 Reasons Why
Retailers and Restaurants Trust HUGHES and VMware

More than just a managed services provider, Hughes is a true partner that understands how managed security services for retail, including VMware SD-WAN™ and VMware SASE™, best support retail IT teams so you can focus on your strategic initiatives.

Here are the **top reasons why** retailers and restaurants trust us:

1. Our Managed Services Help Retail Work Better

To boost retail customer and employee engagement, Hughes custom-tailors solutions including automated VMware SD-WAN and SASE cloud-delivered security, simplifying your process from installation through customization, delivered with a single bill.

2. We Improve Agility and Flexibility

You need to move fast to incorporate changing retail technology. Hughes enables you to quickly ramp up your cloud usage, scale bandwidth, securely spin up new environments or pop-ups, and run different configs at different sites—providing you with rapid updates and insights into your network, security, and operations.

3. We Know Security

Threat actors are more active than ever, often targeting retail. We help your team keep them at bay by deploying the specific managed security services and VMware SD-WAN / SASE solutions that allow your team more time to focus on your mission.

4. We Deliver Flexible Cloud Access

For today's retail environment demands, including secure cloud acceleration and WAN optimization for successful store operation, customer loyalty access, and PCI-compliant point of sale, Hughes has you covered.

5. We Help Lower Bandwidth Costs

With SD-WAN and SASE solutions built from VMware technology, Hughes provides the communications underlay and overlay best suited to improve your access, while lowering your Op-Ex and Cap-Ex costs.

Benefit From a Partnership That Works – Hughes and VMware

Hughes managed security services help pave the path to a comprehensive SASE framework or architecture based on VMware's pre-integrated leading technology solutions. We help retailers reduce complexity and get the most from AI and multi-domain / multi-platform automation and orchestration in support of core business operations at your sites throughout the U.S., while lowering your networking costs. In fact, MSSP Alert just recognized Hughes as a global Top 250 MSSP for meeting the highest quality in cybersecurity – for the second year in a row.
